Subject: E&E/Start Contractor

Hi Jeff.

I enjoyed working with you on this response. As always, I really appreciated having E&E there as a resource for the response. Those folks have fantastic technical depth and provide a lot of assistance to other responders who may not be as well versed in sampling, instrumentation, and health and safety. Their expertise in air monitoring was particularly helpful on this incident and really helped keep the response moving forward under challenging conditions. Feel free to pass this along Faye and Bryon or their manager.

Thanks.

Geoff Brown
